Summary

Software Engineer with four years of experience, I successfully combined my studies, job and other commitments showing myself to be self-motivated, organized and capable of working in collaboration with others. Additionally, I am highly motivated, quick to learn and adaptable.

Skills Highlights

- Well-versed in web development tools including HTML, CSS, JQuery, WordPress, Bootstrap and Tailwind CSS.
- Experienced in Search Engine Optimization (SEO).
- Skilled in programming languages and frameworks such as PHP, JAVA, SQL, JavaScript, React, Next Js and Vue/Nuxt Js.
- Mobile Development with React Native and Expo.
- Clear and understanding knowledge in the versioning tools Git and GitHub.
- Skilled in web application and REST APIs development with SpringBoot and Laravel.
- Cloud and AWS including Amazon S3, SES, IAM and Firebase.
- AI-assisted development with Claude Code and OpenAI Codex: agentic coding, code review, project context files.
- Other Skills: Node, Express, GraphQL, SQLite, MongoDB, PHP Unit, GraphQL, FireBase, TypeScript, Testing, Cucumber, Cypress, Salesforce.

Experience

Founder / Full Stack Software Engineer (10/02/2026 – Present)
- **Flame Interactive**, (**Calgary - Canada**)
  - Built the "Flame" social mobile app in **React Native** / **Expo**: community feed, real-time chat, forums, playlists, game library, trailers, events and news, all in English and French.
  - Designed and built the **Laravel REST API** behind the app, and website, queued jobs, **Redis** caching and automated tests in Pest
  - Added **Firebase** services: Authentication with Google Sign-In, Firestore for real-time chat and presence, Cloud Messaging push notifications, Storage and Crashlytics.
  - Created or reviewed detailed prompts in various topics and responses to guide **AI** learning, ensuring the models reflect a comprehensive understanding of various topics.
  - Used **Claude Code** for AI-assisted development (planning, coding, code review and debugging) across four codebases.
  - Built the public company website and admin in **Next.js** and **TypeScript**.
  - Added in-app subscriptions with third party libraries and ensured proper connection with app stores subscription listings.
  - Android and iOS releases through EAS Build and over-the-air updates with Expo Updates.

Database Administrator (29/06/2026 – Present)
- **Habitat For Humanity Southern Alberta**, (**Calgary - Canada**)
  - Administered and maintained Salesforce CRM, managing donor records, relationships, campaign data, and transactional information while maintaining data integrity and consistency.
  - Applied SQL and relational database concepts to query, analyze, manipulate, and validate data for reporting, reconciliation, and business analysis.

- Built and maintained Salesforce reports, dashboards, formulas, and data queries to transform business requirements into actionable data insights.
- Investigated and resolved database discrepancies, data integrity issues, reporting errors, and CRM-related problems, improving reliability of operational and fundraising data.
- Performed data migration, import/export, deduplication, cleansing, and validation using Salesforce tools and SQL/database techniques to maintain high-quality datasets.
- Supported Salesforce users by troubleshooting database issues and improving data-entry processes

Data Trainer (03/02/2025 – 18/06/2026)

- **SuperAnnotate**, USA (**Remote**)
  - Created or reviewed detailed prompts in various topics and responses to guide AI learning, ensuring the models reflect a comprehensive understanding of various topics.
  - Evaluated and ranked AI responses to enhance the model's accuracy in various contexts.
  - Tested AI models for potential inaccuracies or biases, validating their applicability in the respective domains.
  - Executed multiple tasks to enhance, review and refine AI models using technologies like **React**, **Laravel**, **TypeScript**.

Software Engineer (24/07/2023 – 01/11/2024)

- **ADAA**, Douala - Cameroon
  - Development of both web and mobile applications using the latest technologies of **React**, **Next Js**, **Tailwind CSS**, **TypeScript** and **React Native**.
  - Responsible for the development and Integration of RESTFUL APIs for the backend of projects using **Laravel**.
  - Modeling, documenting and design the technical architecture of each of the projects within the company.
  - Maintain and ensure the proper functioning and continuity of various web and mobile applications following the main guidelines.
  - Organize and execute functional and security tests on the different modules, both web and mobile solutions.
  - Collaboration with UI/UX designers to improve user interfaces and designs.

Software Engineer (20/02/2023 – 25/10/2024)

- **Doluck Sarl**, Cameroon (**Remote**)
  - Responsible for the development of both websites and web applications using technologies such as **Laravel, Bootstrap, TypeScript, React, Next JS, WordPress**.
  - Development of mobile applications using **React Native** and **TypeScript, FireBase**.
  - Responsible for the development and Integration of RESTFUL APIs using **Laravel and MySQL**.

Full Stack Developer (19/07/2021 – 23/07/2023)

- **NKAP SARL**, Douala - Cameroon
  - Worked on several web applications using technologies like **Nuxt/Vue JS**, **React**, **PHP**, **Laravel** and **WordPress**.
  - Development of mobile applications using **React Native**, **TypeScript**, **Expo RN**, **REST APIs** and **Firebase**.
  - Took part in testing and automating web applications and software using technologies like **Cypress** and **Cucumber**.
  - Integration of **RESTFUL APIs** in both web and mobile applications.
